

AnyRidge + 911 Kit

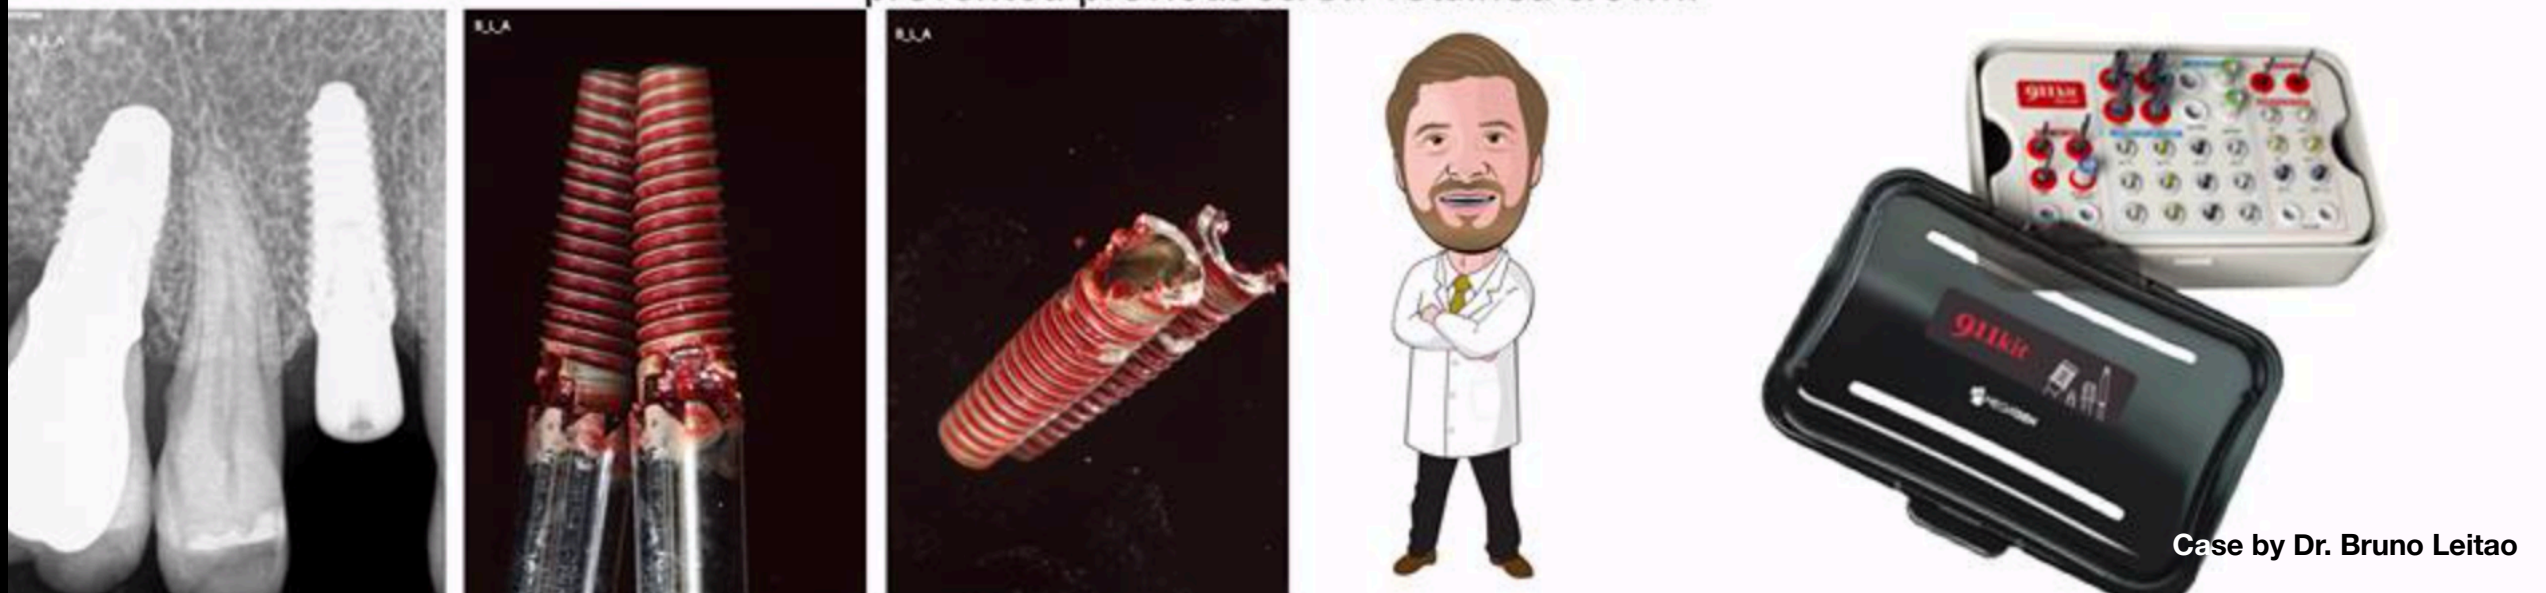

Dr. Bruno Leitao

Using 911 Kit from Megagen we can tackle some serious problems with ease.

Always have the tool for the job!

Removal of broken tri-channel connection implant (my case, 8 years ago) and immediate Anyridge, correcting bucal tilt that prevented previous screw-retained crown.

Case by Dr. Bruno Leitao

Find this MegaGen 911 Kit very helpful in dire situations. As long as the prosthetic screw hole is intact we can avoid trephine and bone destruction.

Just made my last appointment very peaceful!
